

Waterproofing

TRIPLE-K

BLOCK FILLING COMPOSITE

DESCRIPTION	QUICKWALL TRIPLE K is a blue synthetic rubber <i>Gel concentrate</i> formulated to use with cement and water to waterproof masonry blocks prior to painting.
SUITABLE FOR	TRIPLE K bonds to most substrates including polystyrene, Hardie sheet products, AAC Concrete, Plasterboard, Masonite, Off-form concrete and Metal.
SPECIAL FEATURES	<ul style="list-style-type: none">• Economical, multi function product.• It has superior bonding and mechanical strengths for above or below grade.• It is environment friendly and washes up in water.• It is flexible and remains flexible after curing.• It is bacteria resistant.• It can be oxide tinted.
SURFACE PREPARATION	Surface to be totally clean and free of mortar, dust, loose particles, oil and other contaminants. Evenly dampen wall with water to an even consistency.
APPLICATION	Masonry Blocks <ol style="list-style-type: none">1. Mechanically mix TRIPLE K : water : cement in a ratio of 1 : 4 : 4(or 5) to a paint consistency. This should be carried out using a slow speed drill (400 rpm) and grout mixer. Do not extend long mixing times risking aeration of the TRIPLE K slurry.2. Apply with a soft nylon broom to the damp masonry surface and allow to dry. General practice is to pour the slurry contents into a wheel barrow for easy and consistent access. Drying time should be a minimum 48 hours prior to painting substrate.3. Apply Quickwall AQUASEAL elastomeric membrane paint to dry substrate.4. Repeat step 3 (2 coats of AQUASEAL provides 300 um film thickness protection).
NOTES	Other premium grades of exterior paints are compatible with TRIPLE K . TRIPLE K concentrate is coloured "BLUE"
APPROVED FOR	Government Projects, Defence Housing Authority, Commercial and Domestic applications.
GUARANTEE	Ten years when applied by an Approved Applicator in accordance to Quickwall specification.

SPECIFICATION

1 st Coat	Apply Quickwall TRIPLE K
2 nd Coat	Apply 1 coat of AQUASEAL
3 rd Coat	Apply 1 coat of AQUASEAL
